RESEARCH INTERESTS

Research Area Media Art / Digital Art, processes of digital participation and interaction;
Important Results Participation in Art is well researched, however Media Art and Digital Art have a long tradition in participatory processes that have not been taken into

account by contemporary art critics and art theoreticians. The PhD thesis and later monograph “Crowd and Art” was an important theoretical contribution, she published papers and articles on this topic and gives lectures.

Research Area	Critical Data, Art & AI
Important Results	Artistic research on data and data processing systems through various theoretical and practical frameworks with the main focus on discrimination or disadvantage-critical issues; Lecture series on Critical Data in collaboration with University of Luxembourg (Prof. Christoph Schommer); and FeministAI – Public Lecture Series , University of Arts Linz;
